

1. Install the Advantech device manager: "Advantech Device Manager_32bit.exe"
2. Install the device driver: "USB4704.exe"
3. Plug in the device.
4. Open Advantech Device Manager and setup the 4704 device as shown:

Make sure you select 'Differential' inputs so that the device can work in all the voltage ranges

5. After configuring the device, click on 'Test' and make sure you can select more than one input range option:

Good to go!
